

VIEWABLE, SECURE ON-SITE DIGITAL EVIDENCE ISOLATION

Isolate wireless devices and view data without comprising the data security with Select Fabricators' Shielded Window-Touch Forensic Pouches.

More affordable than lab-based nonportable metal enclosures, the Window-Touch Pouch allows for

viewing and hands-on manipulation of wireless devices in an RF tight environment, making sure internal data is not compromised from moment of capture. There is no need to take the captured device back to the laboratory to view information on the device.

ENHANCED VISUAL ACCESS

The oversized, see-through, non-glare, shielded mesh window allows device manipulation in the field.

SELECT-A-SHIELD ASSURANCE

Look for the SELECT green shield as your assurance for optimum protection.

Select-A-Shield RF/EMI Shielding Forensic Pouches are US made with a double layer conductive silver/copper/nickel RoHS compliant material. The pouch has been tested and yields better than -80 dB RF Isolation from 500MHz to 6.0GHz.

Shielded Window-Touch Forensic Pouch

HIGH ISOLATION PERFORMANCE

All of the Select-A-Shield Window-Touch Forensic Pouches deliver RF/EMI shielding, blocking portable electronic devices from accessing active wireless networks. Lightweight and flexible,

these pouches are manufactured using SELECT's proprietary silver/copper/nickel conductive fabric. This conductive, flexible material is the same fabric used over the past decade to make tabletop to room-sized RF shielded enclosures.

ANY DIGITAL DEVICE

The Select-A-Shield Window-Touch Forensic Pouches work with any portable electronic device with capacitive sensing touch screens like Smartphones, tablets, and GPS units.

EXTRACT DATA ON-SITE SECURELY

SELECT's Window-Touch Forensic Pouch line includes two standard sizes of "Faraday bags" - Cellphone and Tablet - as well as, an innovative USB Forensic Pouch for extracting data from the

capacitive wireless devices in the field.

BENEFITS

- High RF Shielding performance of -80dB @ 1 Ghz.
- Oversized window-touch screen does not require a stylus.
- Immediate and easy on-site device manipulation
- Lightweight for portable device containment and transportation.
- Works with any portable wireless device including Smartphones, tablets, and GPS units.

FEATURES

- Patent-pending design
- Large non-glare window made of double-layer conductive mesh for high shielding performance allowing full screen viewing
- Reusable. Conductive material will maintain shielding performance for hundreds of captures.

PART NUMBER	DIMENSIONS	CONSTRUCTION	APPLICATIONS
SFP610	Pouch ID: 5.75" W x 9" L Window: 5.75" W x 7" L Insert Opening: 3.5" W x 5" L	Double Rollover Closure, foam insert	Portable devices - cell phones, pagers, iPhones, Blackberrys
SFP1113	Pouch ID: 10.5" W x 12.5" L Window: 10.5" W x 10" L Insert Opening: 7" W x 9" L	Double Rollover Closure, foam insert	Mobile tablet devices - iPads, RFID tagged documents

Options

- Clear evidence tag pocket
- Ballistic nylon exterior layer

The Select-A-Shield USB Forensic Pouch includes both a window-touch screen and a 2.0 USB connection for field forensics. Contact SELECT for complete specifications.
